

Annual Progression

(/profile/c0073813/)

Current Record

-  Type: Progression
-  Status: with Supervisor (progression)
-  Student deadline: Jan. 17, 2022
-  Supervisor deadline: Jan. 24, 2022

Student Details

-  Eriol Fox Reichelt (/profile/c0073813/)
-  Initial registration: Feb 9, 2021
-  Thesis deadline: Feb 8, 2028
-  Faculty of Science, Agriculture & Eng (50184126)
-  Computing (50184203)
-  PhD Computer Science (part time) (8050P)
-  Year 1
-  Sponsor: This data is not yet available in the new data set.
-  Postgrad Research
-  200738134 / c0073813
-  p.reichelt2@newcastle.ac.uk (mailto:p.reichelt2@newcastle.ac.uk)
-  gradschool@ncl.ac.uk (mailto:gradschool@ncl.ac.uk)

Supervisor(s)

-  Rachel Clarke

Title

"How do human-centred designers currently contribute Humanitarian Open Source Software (HOSS) and how is centred design viewed within HOSS?" A critical explorati human centred designers participate in and contribute humanitarian Open Source Software.

A. Progress

Do you consider that you have made satisfactory progress during the academic year and will be on track to complete according to your project plan?

Yes

Briefly outline your progress to date in relation to your project plan. Attach a copy of your approved project plan for the Progress Panel using 'Attach Evidence' (below).

Literature review: Ongoing, progress at roughly 60% with papers read across Open Source Software (OSS) Design Humanitarian/Human Rights tech.

Ecosystem mapping with humanitarian/Human-rights or Innovation, design and open source: planned, ethics review relationships built and interviews commencing Feb-Jun

Hackathon and open source collaboration observations observed, 1 planned in early Feb 2022 with Techfugees Nairobi tech refugee camp and next being organised for 2022/early 2023 with Ushahidi + Sloan + Google open source office funding.

Applications to 1 professional conference (Rights Con 2022) <https://www.rightscon.org/>

Several professional conference talks during 2021 + 2022

Application/exploratory paper to PDC in progress: <https://pdc2022.org/exploratory-papers/>

Paper in progress to FAcCT: <https://facctconference.org/>

Various other enrichment activity such as a supplement application to

OCEAN: <https://vermontcomplexsystems.org/partner/O>

Podcast conversations with OSS, PhD and Design academics: <https://sosdesign.sustainoss.org/15>

Open and viewable progress available here: https://github.com/Erioldoesdesign/Design_HOSS

Please comment on any individual aspects of your progress with which you are either particularly satisfied or dissatisfied. Outline any concerns or problems you may have.

I am very satisfied with my active data gathering research such as informal conversations to build relationships with humanitarian and human rights orgs and OSS projects and positive about the ecosystems mapping and observation gathering.

I'm less satisfied (discussed with supervisor and advisor) progress on the written part of my literature review (research successful) and paper writing, which would be among skills from my practice based background. We have met for 2022 to improve this though.

If you believe you have any Personal Extenuating Circumstances (PECs) that have significantly affected your progress, please provide details and indicate the impact on your progress. Attach evidence, where possible, to support your claim.

My PT job did not extend their contract in May/June 2021, June, July and August difficult and job seeking months so I considered deferring for 1 year to find a FT job and then 2022 but I was successful in finding another PT contract in September 2021.

Balancing work hours as a senior management staff member PT will continue to be both a challenge and an opportunity but also connections within the relevant industry may help.

B. ETHICAL APPROVAL

At Ethical Approval, was your project identified as?

Low Risk

Date of ethical approval

2021-12-15

Have been any changes to the project since the ethical review was carried out?

No changes to direction just refinement of the nature of research data gathering with participants through observation interactions and interviews.

Ethical approval for observation work is still pending as

Eriol has some pending actions about using their chosen legal name on paper writing which is being reconciled.

If high-risk ethical approval should have been sought and this has not yet been approved, please provide an update on your ethical approval status below.

N/A

Have you reviewed the ethical approval of your project with your supervisor to ensure that it is still relevant?

Yes

C. HEALTH AND SAFETY

Have you received the appropriate health and safety training for your research project?

No

D. RESEARCH TRAINING

Have you discussed your research training needs with your supervisor and attended relevant research training events?

Yes

Do you feel that your training needs have been met?

Include any information from Training Needs Analysis.

Many trainings we (myself and my supervisor) identified enrollment have been delayed due to the pandemic. The most essential of those is working with underrepresented communities internationally.

HaSS at Newcastle offer: *Doing International Fieldwork in Contexts* which Eriol would like to attend to meet this training requirement.

E. SUPERVISION

Have you had regular contact with your supervisor (approximately monthly or equivalent for part-time students)?

Yes

Meetings

0 Confirmed

0 Unconfirmed

[View meetings \(/profile/meetings/c0073813/\)](/profile/meetings/c0073813/)

Are there any problems or issues that you would like to draw to the Progress Panel's attention (for example regarding supervision or resources)?

No

If yes, have you discussed these problems fully with your supervisor, Postgraduate Director/Tutor or Head of School?

Yes

F. Data Management Plan (DMP)

The DMP is intended to be a living document in which a project's approach to the management and sharing of data becomes more detailed over time and significant changes are included. This is especially relevant for PGRs as their understanding of the research process will develop rapidly over the course of the project. Further information on DMPs and guidance is available here. (<https://www.ncl.ac.uk/library/academics-and-researchers/research/rdm/planning/pgr>) (<https://www.ncl.ac.uk/library/academics-and-researchers/research/rdm/planning/pgr>)

Have you reviewed and updated your research DMP?

Yes

If yes, please upload your DMP below.

If no, please provide further information in the text box below.
